SUMMARY

Strategy Associate at PwC with a CS background, specialising in GCC operating model design, AI-led transformation, and enterprise restructuring for global FMCG, chemicals, and cement clients. Known for translating complex, multi-stakeholder problems into clear operating models and actionable roadmaps from C-suite strategy to on-ground implementation.

EXPERIENCE

PwC (PricewaterhouseCoopers) | Associate-Strategy Associate

Aug 2025 - Present

- Led GCC strategy for a global FMCG client by defining the operating model, planning transitions, and hiring 35+ key roles to support India Tech Hub's multi-year transformation, which enabled a 20% faster market entry for new products
- Launched an AI helpdesk for a specialty chemicals manufacturer, cutting review cycles by 30% and resolution time by 20% using Agile methods and Asana.
- Co-led a national AI Accelerator that launched 12 enterprise tools, wrote product requirements, set up governance, and increased tool adoption by 15% in three months.
- Redesigned IT operating model for national cement leader implementing hub-and-spoke structure across 15+ states; mapped functional overlaps, defined governance frameworks, and enabled 25% faster incident dispatch through organizational clarity
- Authored the 5-year India Tech Hub Strategy and Activation Plan, mapping phased transition roadmaps and scaling headcount from 27 to 108 FTEs across France, Spain, Poland, and India, enabling the hub to meet expanding regional project demand
- Built Power BI dashboards for the Data & AI SteerCo delivering zone-level workforce projections across four geographies, enabling coordinated regional planning.

PwC- PricewaterhouseCoopers | Advisory Intern

Jan 2025 - Aug 2025

- Partnered with paint manufacturing leader's C-suite on SAP FICO/MM optimization, cutting processing time by 10% and supporting 500+ users with targeted training programs and executive dashboards
- Developed and deployed project management tracking for 15+ initiatives; recognized for zero issue slippage and real-time exec reporting.
- Advanced process improvement by mapping pain points with Lean Six Sigma, automating reporting workflows using VBA and Python, which cut reporting cycle time by 20% and embedded continuous-improvement protocols into legacy operations

EY (Ernst & Young) | GCC Research Intern

Aug 2023 - Dec 2023

- Engineered and rolled out an AI sales pipeline, reducing manual prospecting by 75% and boosting acquisition speed by 60%, used across four major city offices.
- Built interactive business intelligence dashboards in Tableau and Power BI providing real-time visibility into client acquisition metrics, pipeline performance, and operational efficiency indicators
- Conducted GCC benchmarking research across technology, FMCG, and logistics sectors using KPI design and Python analysis, and provided insights that informed Fortune 500 client strategy and recommended best practices

BelleVidCo (Digital Agency) | Co-Founder & CEO

Feb 2023 - Dec 2024

- Built operational systems for clients across logistics, fashion, and PE advisory sectors, including an ML-based SKU placement algorithm (~35% pick travel reduction) and a live-data AI pricing engine replacing founder-dependent workflows for a fashion retailer.
- Designed and led a lean team of 8, achieving high ad ROI and launching 200+ growth campaigns

Recover Media | Marketing Team Lead

Aug 2020 - Jan 2023

- Led a 12-member marketing team, growing the subscriber base by 8,000+ in six months and lifting engagement rates by 50% through structured content and campaign systems
- Built and executed multi-platform campaign frameworks that drove a 20% increase in brand awareness, establishing partnerships and distribution channels that compounded organic reach

EDUCATION

Vellore Institute of Technology (VIT) | Bachelor of Technology, Computer Science

Aug 2021 - Aug 2025

PROJECTS

Enterprise Capability Generator

- Built a browser-based consulting tool that ingests capability scoring data (XLSX) across 8+ business domains and auto-generates fully formatted, branded PowerPoint decks in one click, cutting 4-6 hours of manual slide-building per engagement
- Supports L0/L1/L2 capability taxonomy with 0-5 scoring, live slide preview, score distribution analytics, and configurable color theming

Medical Prediction Bot

- * Built an AI-powered pharmacy demand forecasting tool that predicts medicine requirements across 7-60 day horizons, flags expiry risk by batch, detects prescription-to-sale leakage, and classifies inventory using ABC/XYZ algorithms, with AI-generated executive summaries for leadership decision-making

EXTRACURRICULAR

Rivera VIT University | Sponsorship Coordinator

Jan 2024 - Mar 2024

- Analysed sponsorship proposals and managed 1.25cr+ budgets for 250 events, securing Pepsi as the title sponsor. Developed financial strategies to maximize sponsor ROI and ensure efficient resource allocation.

graVITas VIT University | Finance & Sponsorship Manager

Aug 2024 - Sep 2024

- Negotiated 75L+ sponsorship deals with Altium, Autodesk, Nestlé, and EaseMyTrip. Leveraged data-driven insights to identify optimal sponsors and streamline budgeting for enhanced event performance.

CERTIFICATIONS

- Financial Markets: Yale University, Coursera
- Generative AI Leader Certification: Google
- Tableau, Power BI, SAP Advanced User
- BCG Consulting & JPMorgan IB Simulations
- Business Analysis & Process Management: Coursera
- AI Fluency Framework & Foundations: Anthropic
